MorphoSys Announces That Its Licensee Janssen Has Received Approval for Tremfya® (Guselkumab) for the Treatment of Moderate-to-Severe Plaque Psoriasis in Canada

Janssen's Tremfya® now approved in the U.S., Canada and the European Union

MorphoSys AG (FSE: MOR; Prime Standard Segment, TecDAX; OTC: MPSYY) announced today that its licensee Janssen Inc. (Janssen), previously reported Health Canada approval of Tremfya® (guselkumab) for the treatment of adults living with moderate to severe plaque psoriasis who are candidates for systemic therapy or phototherapy.

Tremfya® (guselkumab) is a fully human anti-IL-23 monoclonal antibody developed by Janssen and was generated utilizing MorphoSys's proprietary HuCAL antibody library technology. MorphoSys is eligible to receive royalties on net sales of Tremfya®.

Dr. Simon Moroney, Chief Executive Officer of MorphoSys AG, said: "We are very pleased that Tremfya® has now been approved in three territories, namely the U.S., Canada and the European Union. We expect this drug will provide an important treatment option for patients living with moderate-to-severe plaque psoriasis."

Beyond plaque psoriasis, Janssen is studying Tremfya® (guselkumab) in a Phase 3 psoriatic arthritis development program.

Further information about the Canadian approval of Tremfya® (guselkumab) can be found in a press release issued by Janssen on November 15, 2017.

About Psoriasis

Psoriasis is a chronic, autoimmune inflammatory disorder that results in the overproduction of skin cells, characterised by raised, inflamed, scaly, red lesions, or plaques, which can cause itching and physical pain. It is estimated that as many as 125 million people worldwide have psoriasis, thereof about one million Canadians, and approximately 20% of people affected have cases that are considered moderate to severe.

About MorphoSys:

MorphoSys is committed to developing exceptional new treatments for patients suffering from serious diseases. A leader in the field of therapeutic antibodies today, MorphoSys is driven by the ambition of creating the most valuable pipeline of biopharmaceuticals in the biotechnology industry. Based on its proprietary technology platforms, MorphoSys, together with its partners, has built a therapeutic pipeline of more than 110 programs in R&D, around a quarter of which is currently in clinical development.

In its proprietary development segment, MorphoSys, alone or with partners, is developing new therapeutic candidates, mainly focusing on cancer and inflammation. In its partnered discovery segment, MorphoSys uses its technologies to discover new drug candidates for pharmaceutical partners and participates from the programs' further development success, through success-based payments and royalties. MorphoSys is listed on the Frankfurt Stock Exchange under the symbol MOR. For regular updates about MorphoSys, visit <http://www.morphosys.com>.
